But the 15th and early 16th c literary Fr form was *povre* artificially spelt in 15th c *pauvre* after L *pauper*, and ME *pōre* (the source of mod Eng *poor*) seems to have been reduced from *povre* like *o er* from *over lord* from *loverd* Cf also POORTITH, PORAIL, POVERTY But some Eng dialects now have *pour* (paur), which prob represents ME. *pour* (pūr).]

[*Note* The extension of the sense haven or 'harbour town' to an inland town presents difficulties, though an explanation has been sought in the definition of L. *portus*, in the *Digest* L. xvi. (*De verb signif*) 59 'Portus appellatus est conclusus locus, quo importantur merces et inde exportantur; eaque nihilo minus statio est conclusa atque munita The transference of sense from 'gate' to 'walled town with gates' is also unlikely Inasmuch as PORT1 and PORT3 though representing respectively L. *portus* and *porta*, were both masc. in OE., the fact that this *port* was also masc affords no evidence either way The MFl words are in a similar position there *port* 'haven and *porte* (later *poort*) gate are both fem, and *port* 'town' being also fem. the gender gives no indication But the oldest and prevalent form of the word was *port* or *poort*, *porte* being unusual and late and prob due to confusion with *porte* 'gate; Verwijs and Verdam take it therefore as certain that *port* town represented L. *portus*; and if this was so in Flemish it was doubtless so also in OE The Netherlandish word was extensively used down to c1500, and had numerous derivatives (of which *poorter* citizen *poort* or *poorterregt* burgess-ship, citizenship, are still in use) Cf also PORTERY]

In recent times generally substituted for the older *larboard* to obviate misunderstandings arising from the similarity in sound of *starboard* and *larboard* By international convention ships exp aiments carry a red light on the port side

[Note. This use of *Port* may have arisen either from Port *sb*.1, senses 2 c or from Port *sb*.3, sense 2. When the steering apparatus was on the right side of the vessel (the *steerboard* or *starboard*) it would be convenient in order to leave this free to have the *port* (entering port) on the opposite side (the *lade board* or *larboard*). For the same reason the vessel when in port would naturally be placed so as to lie with her larboard alongside or facing the shore or port For either reason, the larboard would be the port side *Port for larboard* was in recorded use more than two centuries before it became official; the existence of Port *v*.2 indicates a still earlier colloquial use.]

b Law The visible possibility of exercising over a thing such control as attaches to lawful ownership (but which may exist apart from lawful ownership), the detention or enjoyment of a thing by a person himself or by another in his name, the relation of a person to a thing over which he may at his pleasure exercise such control as the character of the thing admits, to the exclusion of other persons, *esp.* the having of such exclusive control over land, in early instances sometimes used in the technical sense of Seisin

In the Roman Law possession is usually said to consist of two elements—physical control and intention to possess but in English law the latter element does not assume the same prominence as in the hape of the *animus dominī* as has been thought to assume in Roman law The general rule of English law is that exclusive physical control gives legal possession unless the apparent possessor holds only as servant or bailiff on behalf f another (J M Lightwood in *Encycl Laws Eng* (1898) X 29). Primarily the term denotes a state of fact but this fact carries with it legal attributes, and so is the source of rights Hence the state of fact could always be ascertained with certainty and of it always produ ed the normal legal effects, the sul ject of possession might establish title (*ibid*) but this is now very uncertain to whom the actual control of a th ng is to be attributed and when this question is settled the law may credit the advantages of possession to some other person than the apparent possessor Hence arises the distinction between *actual* and *legal* possession Actual possession denotes the existence of fact, but the person to whom are credited the advantages of possession has the legal possession whether he is the actual possessor or no Legal possession is usually accompanied by possession in fact known as 'possession in law' (*Ibid* 228-9) See this article also *inter alia Essay on Possession in the Common Law* by F Pollock and R S Wright 1888 *Treatise on Possession of Land* by John M Lightwood 1894

The English law, however, differing herein from the Roman law does not refuse legal possession to bailees *Ibid* 236 In the case of goods the mere right to possession is some times described as constructive possession, and is allowed the advantages of actual possession

So far as the Naval Regulations are concerned the appellation appears to date from about 1731-47, and to have ceased in 1824, when the rule was laid down that only officers appointed to command ships of sixth rate and upwards shall henceforth be styled Captains But, in un official language the courtesy use of 'Captain' for the 'Master and Commander of a smaller vessel, and the distinctive appellation Post Captain , lingered to a much later period.

Post, obs. form of *posed*, pa. pple. of Pose *v.*[1]

Post, variant of Poust (*Obs.*, *power*).

Post (*poust*), *prefix*, repr. L. *post*, adv. and prep., after behind. In L., prefixed adverbially to verbs, as *posthabēre* to hold or esteem after, *post ponĕre* to place after, postpone *postscribĕre* to write after, also to pples., vbl. sbs., and other verbal derivatives, as *postgenĭtus* after born, *postpositus* placed after, *postscriptus* written after, *postventus* coming after, *postparitor* after getter, heir. Hence almost at will, not only on words from Latin, but also, in technical terms, from Greek, and sometimes even on English or other words, as *post-breakfast*, *post Easter*, *post Elizabethan*. These are often opposed to formations in *ante* or *pre*.

A. Words in which *post* is adverbial or adjectival, qualifying the verb, verbal derivative, or other adj. or *sb.* forming, or implied in, the second element. Such compounds derived or formed from L. or on L. analogies as Post date, Feast, Fix, Pone, -p se, Posit, Vene, Geniture jacent, Script (q. v.), also in nonce wds., sometimes formed after, and as the opposites to, words in *ante-* or *pre* (exceptionally *pro*).

b In *quasi* adjectival relation to a sb. (chiefly a verbal sb. or noun of action) forming, or implied in, the second element = Occurring or existing afterwards, coming after, subsequent later as *post accession*, *act*, *argument*, *contract division*, *-frui tion*, *-s sue* *-legitima tion*, *opera tion*, *pa rdon*, *penance*, *st gner*, *-varia tion*. Postmaster [4] (pō̆st mɑnstəɹ) The name given at Merton College, Oxford, from the 16th c, to the class of poor scholars instituted in 1480 by John Wyllyot, now the equivalent in that college of the term 'scholar' in general collegiate use

For the first hundred years these appear in the College Register only as *pueri* (*V Johannis Wyllyot* Wyllyot's boys). But their essential characteristic was the reception of a limited weekly portion *ebdomadalis portio* as here we find them (fr. a 1483) styled *pueri mensæ* or (1546) *pueri Domini* a ter n Knight in the 17th c as by Wood as *portionists*. The age of the term *postmaster* is not certain it occurs in the College Records in 1593 11 the e tablished name of *Extranatiens' Hall* the dwelling opp osite to the college in which the *pueri* or *pr ostmr* lived re ired till c 1575 when they were moved into the college It also appears as the appellation of the *pr t ostmr* in the English letters of 1610 preserved in the Records But these casual occurrences show only that it was then a long established name As to its origi n nothing is known it has been variously co jectured to be a corruption of *portæ mensæ* or a rendering of '*post magister* or '*post mu ister* in allusion to the fact that the *pueri* were at one time servants to the Masters or Fellows perhaps standing behind their chairs at dinner etc But *Post munister* does not occur in the college register, and the occurrence of *post magister* is doubtful

The sense history of *potash* and its derivatives is involved in the advance of chemical knowledge The earliest term was *pot ashes* or *pot ashes* = Du. *pot asschen* applied to the crude products The essential substance of these, when purified from extraneous matters, was spoken of in the singular as *pot-ash* or *potash* In 1756 this was proved by Dr Joseph Black of Edinburgh to be a compound substance, a carbonate, the removal from which of the carbonic acid left a 'caustic alkali' or 'lye' (really the hydroxide or caustic potash KHO), which chemists thereafter generally considered to be the true *potash* (in Fr *potasse*) In 1807 this, in its turn, was shown by Sir H Davy to be not a simple substance but to contain a new metal, of which he believed it to be the oxide. To the metal (K) he gave the name *potassium*, to the oxide (on the analogy of *magnesium* and *magnesia*, *sodium* and *soda*, etc) that of *potassa* Next year, Dakeel gave reasons for believing that the latter contained also water, and it was subsequently shown to be the hydroxide or hydrate (KHO), the simple oxide being the anhydrous form (K_2O) The salts of potassium in accordance with the chemical theory of the time, were viewed as compounds of the oxide and variously named *carbonate of potassa*, *of potass*, *of potash* (= potassium carbonate K_2CO_3), *chlorate of potassa*, *potass*, or *potash* (= potassium chlorate, $KClO_3$), etc Commercially 'potash' is still often applied to the carbonate, by chemists usually to the hydroxide or hydrate caustic potash, KHO, but sometimes to the anhydrous oxide, K_2O and in names of compounds it is still often used instead of 'potassium' as *chlorate of potash* = *potassium* or *potassic chlorate*

1 An alkaline substance obtained originally by lixiviating or leaching the ashes of terrestrial vegetables and evaporating the solution in large iron pans or pots (whence the name) Chemically this is a crude form of potassium carbonate (more or less mixed with sulphate, chloride, and empyreumatic substances), but was long thought to be (when freed from impurities) a simple substance.

Described in 1553, under the name *papas* in the *Cronica de Peru* of Piedro Cieza, cap xli, p 5 Introduced into Spain, it is said, from Quito, soon after 1580, and thence, c 1585, into Italy; in 1587 grown at Mons in Hainault, whence in 1588 two tubers were obtained and grown by the botanist Clusius, Keeper of the Imperial Garden to Maximilian II; described by him as *Papas Peruanum* Soon grown in other botanic gardens, as at Breslau in 1590 The plant may have been brought independently to England where Gerarde had it growing in 1596; but he was in error in his statement that he obtained it from Virginia (whence the erroneous name *Virginian Potatoes*, long kept up by English writers) for the plant is not a native of Virginia, and was not cultivated there in 16th c In 1693 its introduction into Ireland was attributed to Sir Walter Raleigh 'after his return from Virginia (where he never was), but no contemporary statement associating Raleigh's name with the potato has been found See Bruhfield *Raleghana* in *Ivane Dwonsh Assoc* 1898 XXX 158–197, B Daydon Jackson in *Gardeners' Chron* 1900, XXVII 161 178

5 Physics a. *Potential function* a mathematical function or quantity by the differentiation of which the force at any point in space arising from any system of bodies, etc can be expressed. In the case in which the system consists of separate masses, electrical charges, etc, this quantity is equal to the sum of these, each divided by its distance from the point

Introduced in 1828 by G Green, with special reference to electricity Now usually called simply *potential* (see B 4).

1828 G Green *Applic Math Anal to Electr & Magn in Math Papers* (1871) 9 Newton and Laplace, when an pulsive forces in nature are such that if we consider any material point *p* the effect in a given direction, of all the forces acting upon that point, arising from any system of bodies under consideration will be expressed by a partial differential of a certain function of the co ordinates which serve to define the point's position in space. This combination of this function is of great importance in many in quiries We shall often have occasion to speak of this function, and will therefore, for abridgement, call it the potential function arising from the system 5. 1882 Minchin *Unipl Kinemat* 135 The function *φ* is called the potential. tion of the attracting system, and the curves obtained by varying the constant in the equation $\phi = C$ are called curves of equal potential

b *Potential energy* energy existing in a positional form, not as motion see Energy 6

Introduced by Rankine in 1853, *potential* being opposed to *actual*, as in sense 2 Thomson and Tait substituted *kinetic* for *actual*, making *potential energy* the opposite of *kinetic energy* The Latin expression *vis potentialis* had been used by the two Bernoullis and Euler *a* 1750

According to 18th c statements the test was at times abused by persons who installed in the occupation of an election and of receiving money for their vote boiled a pot in the presence of wit esses on an improvised fireplace in the open air within the borough and thus passed as pot wallers.

I 1. A measure of weight derived from the ancient Roman *libra* (= 327 25 grams) but very variously modified in the course of ages in different countries, and as used for different classes of things, in the British Empire now fixed for use in trade by a Parliamentary standard denoted by *lb* (*L libra*)

Formerly used without change in the pl a usage still sometimes retained after a numeral esp. *stone* and *colloq*, as in *comb* as *a five pound note a twenty pound shot*

This pound consisted originally of 12 ounces corresponding more or less to that of TROY WEIGHT, q v which contains 5760 grains = 373 26 grams This is still used by goldsmiths and jewellers in stating the weight of gold, silver, and precious stones but as early as the thirteenth or four teenth century a pound of sixteen ounces was in use for more bulky commodities This was made a standard for

general purposes of trade by Imperial Act 1 & 2 of merchandise of weight now called Avoirdupois, q.v. This pound of 16 ounces containing 7000 grains = 453.6 grams, has been since 1826 the only legal pound for buying or selling any commodity in Great Britain. In former times the pound varied locally from 12 to 27 ounces, according to the commodity pounds of different weight being often used in the same place for different articles, as bread butter cheese meat malt hay, wool, etc. See a list in *Old Country and Farming Words* (F. D. S.) 174 5. The Scotch pound of 16 ounces of Troy or Dutch Weight consisted of 7648·9496 grains; the Troun pound kept at Edinburgh, 7560·3 grains. *Jones* 1709 also used to translate foreign names of weights, of cognate origin or representati es of *l. libra*. These vary greatly in Italy between 300 and 350 grains in Spain and Portugal the Netherlands, and s me Germa i states between 450 and 460 grams, in other German states Denmark etc between 477 and 500 grams. But the standard German *pfund* is *now* 500 grams, i. e. half a kilogram.

2 *Coining* To test the weight of coins (or of the blanks to be minted) by weighing the number of these which ought to make a pound weight (or a certain number of pounds), and ascertaining how much they vary from the standard
From the earliest times, in the Indenture under which the Master of the Royal Mint produced coins for the King a limit was assigned within which the weight was to be maintained: and as it was impossible to make every coin of the exact weight, it was custom ry, before 1870, to fix the number of grains variation permissible in each pound weight, taken at random from the mass of coins, this variation being termed 'remedy for the Master Thus, for gold coins in which 20 troy pounds of standard gold make 934½ sovereigns the Indenture of 1817 allows a margin of twelve grains in the pound weight a d no more By the Coinage Act of 1870 the remedy in the gold coins is the same as I grain on each sovereign each of which is now separately tested by an automatic weighing apparatus of great delicacy

English shows no trace of an original sense 'purify, nor even of press or squeeze out, while the intransitive sense of, which comes near that of 'drip or flow out, is not of early appearance nor such that the historical connexion of sense is not even plausible.
